Typically Offered:	
Prerequisites:	Minimum eight (8) semester credits in human anatomy and human physiology, and three (3) semester credits in college-level English, and three (3) semester credits in college-level math; BSN 206; BSN 225 and BSN 246, or equivalent.
Corequisites:	None
Requisites:	PSY 201, SCI 131, SCI 225, and BSN 215
Description:	This course emphasizes the provision of professional nursing care for clients across the lifespan with acute medical conditions. The learners will build upon knowledge gained in the basic sciences and other prerequisite nursing courses. The course emphasizes decision-making skills, independent functioning, and a family-centered approach. The course will introduce the learner to the nursing care of acute clients. The course includes application to specific concepts, principles, and theories in various acute care settings.
