

BSN 366 SS2 : Direct Focused Client Care State-Specific Requirement II

Delivery Modality:	Blended
Semester Credits:	1
Contact Hours:	45 Direct Focused Client Care hours
Outside Preparation:	As required to prepare for assigned direct focused client care experiences
Typically Offered:	Based on state-specific learner need and placement availability
Prerequisites:	Minimum eight (8) semester credits in human anatomy and human physiology, three (3) semester credits in college-level English, and three (3) semester credits in College Algebra or equivalent; BSN 266 and BSN 346.
Corequisites:	BSN 366
Requisites:	None
Description:	This course provides eligible prelicensure nursing learners with an opportunity to complete additional direct focused client care experiences in approved healthcare settings. Learners will apply previously developed#nursing knowledge and skills while strengthening clinical judgment, communication, prioritization, safety, and culturally competent client-centered care. The course emphasizes evidence-based practice, professional accountability, teamwork and collaboration, care coordination, and the application of nursing competencies appropriate to the learner's level of progression. Learners will participate in supervised direct focused client care activities designed to support achievement of program outcomes and preparation for professional nursing practice.
